Eidetic memory (/ a? ? d ? ? t ? k /; sometimes called photographic memory) is an ability to recall images from memory vividly after only a few instances of exposure, with high precision for a brief time after exposure, without using a mnemonic device. Although the terms eidetic memory and photographic memory are popularly used interchangeably, they are also distinguished, with eidetic ...

Semantic memory is one of the two types of declarative or explicit memory (our memory of facts or events that is explicitly stored and retrieved). Semantic memory refers to general world knowledge that we have accumulated throughout our lives. This general knowledge (facts, ideas, meaning and concepts) is intertwined in experience and dependent on culture.
